

Screen Printing

Add that little bit extra to your display!

Personalise holders with your company logo, a message or advertising slogan. We can offer you a customised screenprinting service to apply your message etc directly onto the brochure/information holder of your choice.

Requirements

The minimum order quantity for screen print projects is 100 units.

We are PC based. MAC files should be saved in PC format. Most common design and graphics programmes are supported. All fonts must be converted to curves, paths or outlines (Vector files). This avoids font matching and resolution problems and enables us to apply trapping or to make modifications to suit screen process print.

EPS & TIF Files: TIF files must be provided to highest possible resolution and should be at least 1200dpi. For line work all colours should be set as Pantone spot colours and not as CMYK.

Portable Document Files (PDF): PDF files are supported and all fonts must be converted to curves etc as above.

GIF – JPEG – BMP & Word files: GIF - JPEG - BMP and Word files are not acceptable for use as artwork. These files are normally not suitable for reproduction.

Camera ready Artwork: Camera ready artwork can be accepted but this will be scanned and converted to an electronic file.

Brochure Holder & Leaflet Holder Artwork Preparation

It is preferable to supply line artwork for these products but this does not rule out halftone or four colour process work provided the design allows for any screen resolution restrictions. We suggest that any tints are between 30% and 70%.

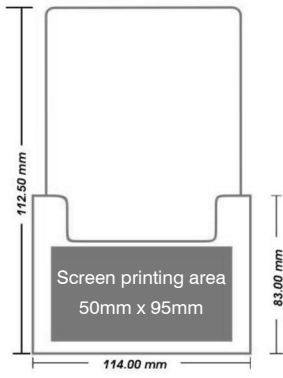

It is advisable to check the compatibility of your programmes with us before dispatching artwork. However, provided it is supplied as a vector file with all fonts converted to outlines there should not be a problem. Please ensure a proof is supplied showing any special instructions. Artwork should be adapted to suit screen process printing. Colour separations, trapping, order of printing colours can be significantly different to lithographic printing.

Brochure Holders & Colour Matching

Certain colours may appear slightly transparent when printed on to clear products. This is due to the pigments used in the manufacture of the inks. In many cases a background colour, such as White, will have to be printed.

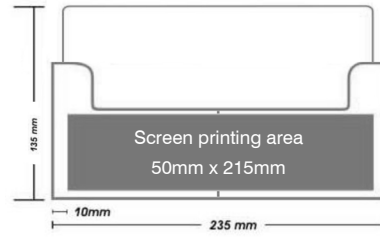

Colour Matching

We use the Pantone reference system. If a reference colour is not available then a suitable swatch should be supplied. Adjustments have to be made to suit the substrate.
